

EXTERNAL DOOR HARDWARE

All doors manufactured by Kitson Windows include 'External Door Hardware' by Fab & Fix which is manufactured to the highest specification and tested to Neutral Salt Spray ISO 9227/BS3900 meeting the requirement of BS EN 1670:2007 Class 5.

For continued protection of the quality finish and appearance, Fab & Fix advise routine cleaning of all external hardware. Moving parts should also be lightly lubricated at least twice a year. This procedure is essential if products are used within a 25-mile radius of coastal areas or close proximity to building sites or industrial areas. Hardware on 'New build' sites must have additional damage protection to ensure that toxic elements like paint, mortar or cement splashes are not deposited on door hardware during construction.

An information tag will be left in place on hardware after delivery or installation by Kitson Windows so that customers can observe the maintenance details.
